FUENTE DE SOL Energy for Generations

Energy from the sun – silent, free of pollutants, inexhaustible and free of charge.

Together with its partners, FUENTE DE SOL operates throughout Europe and has set itself the task to utilize this energy and convert it into electricity and heat. Our staff and partners offer you high quality, innovative products and solutions, currently available on the market, combined with a fair and transparent cost-value ratio.

Years ago, sustainable energies were a dream of a few. Today they are hope for many. And in the future they will be a necessity for all.

Individual Service

Due to our experiences in the international market, we can identify our customers' needs and are thus very competitive also on the domestic market in terms of price and service.

We offer a one-stop solution: from advice, technical and financial planning, to assembly and initial startup, as well as servicing and further maintenance. High quality and performance levels are our priority, both for private clients as well as for business customers.

FUENTE DE SOL – Welcome in the Future!

FUENTE DE SOL – with us you are on the sunny side.

FUENTE DE SOL –

Your partner, who advises you individually and optimally. Our goal is to advise you as a customer optimally and to develop the best solution for your specific needs. Here your wishes, intentions and questions are over compliance.

Our aim is, to use this energy and turn it into warmth and electricity. Together we develop intelligent solutions for people and the environment.

We have got smart energy solutions!

We are your reliable partner for tailor-made solutions - in both small and large energy systems.

Exploit the power of the sun to generate electricity and heat for both the private sector as well as for your business.

Benefit from our long experience and know-how in the implementation of individual, intelligent energy solutions, which operate lucratively, economically and sustainably for you or your business.
